Installation Instructions

Top Extension (for 90" tall units)

GENERAL INFORMATION

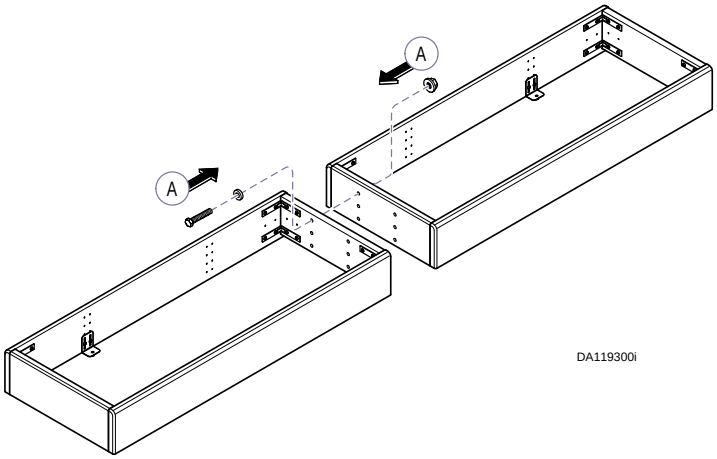
The Top Extension is only for the DM-FCC002 (90") unit. It is used as a filler between the top of the unit and the ceiling of the room. The Extension adds up to an additional 5" height but can be cut down to a minimum of 2".

ASSEMBLY

NOTE

If necessary, the extension can be cut to a minimum height of 2" (5 cm). After cutting, the corner braces from the discarded sections should be relocated, when applicable, to the additional center holes inside the remaining extension.

A. Place the two extension together and secure with four 1/4"-20 x 2 1/4" bolts, washers and nuts.



INSTALLATION

A. Place Extension in position on top of unit and secure with four #10-24 x 5/8" screws
